How to Request Internship Support

Communications · https://www.apni.net/Knowledgebase-APNI/how-to-request-internship-support/

To be more proactive and targeted in identifying our needs for research support from internships, we have created this on-going, centralized process where staff can use THIS FORM to describe your specific needs for student support.

This process will allow us to collect your needs and maintain a public page on our website that can post these opportunities for students…making the topics and entry contacts much more transparent for all.

Forward any feedback or comments anytime.
